

# Are you renting privately and experiencing damp and mould issues?

Participants will receive a £20 Amazon voucher

The charity **Homeless Link** is conducting a qualitative research as part of the West London Alliance's Healthier Homes project. The project seeks to **address health inequalities and poor health outcomes related to damp and mould in the Private Rented Sector.**

**We are looking to hear from anyone who has experience of renting privately in Northwest London\* and have faced or are facing housing conditions issues such as damp and mould in their privately rented property.**

**We are also interested in hearing from those that have health concerns or have developed conditions as a result of damp and mould.**

Sharing your experience will help us in understand what support is currently available and the challenges and barriers that tenants in this situation face. This will also help in identifying what needs to be done to equip communities with the support necessary to improve their housing conditions with the expectation this should improve their health outcomes in the long term.

\* Brent, Ealing, Hounslow, Hillingdon, Harrow, Kensington & Chelsea, Hammersmith & Fulham, Westminster

If you are interested in participating, please email Delia at [delia.Aguila@homelesslink.org.uk](mailto:delia.Aguila@homelesslink.org.uk) or **use the QR code to register your interest** and we will get back to you in due course to set a up an interview via phone, videocall or in person.

The interviews will be **no longer than 1 hour** and all participants will receive a voucher. Note that the information shared will be kept confidential and only serve the purpose of the research.

For more information, please contact Delia at [delia.aguila@homelesslink.org.uk](mailto:delia.aguila@homelesslink.org.uk)
